Numerology is a science of numbers and letters as part of astrology that can explain your present and even forecast your future. If you provide birth date free numerology reading you will receive detailed report that might open your eyes to many things that might get unnoticed otherwise. One of possible discoveries that can be found in such report is what talents or skills you might have that you were never aware of before getting this reading.

Birth date free numerology reading will also reveal the details about the path number you are traveling in this life as well as at roughly what age you will be entering major life cycles and how they will impact your life. Everyone's life is cycling through several phases where some will allow achieving great success but at other times you will experience as some call it bad luck.

Occasionally you have experienced such periods of great moments and most probably wished that such time never ends. Just imagine what can be done if you know when you enter such success phase and can take advantage of this period of time otherwise called as "window of opportunity".

Numerology basically is based on simple mathematical formulas around main theory that every name or birth date can be reduced down to a single number. These numbers are 1, 2, 3, 4, 5, 6, 7, 8, 9, 11 and 22. All of these numbers can be reduced to single digit. Only numbers that don't reduce to single digit are master numbers. Such master numbers or double digits represent people who are teachers and builders in society.

People who have birth date that can be reduced to master numbers indicate potential for a high degree of success but those with one digit often experience difficult or stressful life path. Numerology has been studied and practiced for centuries with quite high rate of effectiveness in using it.

In modern days one of quite common use for it for corporate business is to determine best candidate amongst job applicant especially if list of potential employees is quite long and company needs to select only number of applicants for first round of interviews. Of course numerology is used just as one of criteria for selection besides degree and work experience of applicants but some companies have learned that this method is very effective and increase it's weight against other criteria used.

On the other hand some applicants who know about such approach of companies at selection have used this knowledge and either changed their names for application to have more preferred number or submitted different birth date for same purpose. So as you can see power of numbers is acknowledged even by corporate world which shows how valuable knowledge of your numerology reading can be.
